Indie Hops
FLAVOR PROJECT

Luminosa

The bright fresh fruits of Luminosa® make us feel transported to the sunny white sands of a Caribbean beach, and inspired the name which is Latin for “full of brightness.”

Launched by Indie Hops from the 2022 crop, Luminosa imparts flavors of peach-mango lemonade and candied orange peel to boysenberry, papaya and guava.

One unique trait of this hop is that despite the punchy fruit flavors, it is void of the hop resins that often come with punchy hops. This offers flexibility for brewers to either bring the fruit character through in a smooth, soft hazy or a clean, hoppy lager; or combine with piney/resiny hops such as Strata®, Oregon Chinook or Cascade for a West Coast IPA experience to remember.

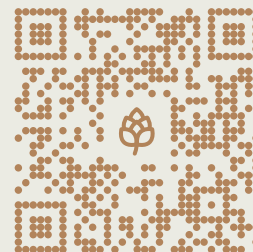

Bred from the open-pollinated seed of a Sorachi Ace, we're thankful that sometimes the offspring is a dramatic improvement on the parent! Luminosa has the striking citrus character of Sorachi Ace and it picked up some incredible fresh tropical fruit flavors—PLUS it managed to leave mom's less desirable traits behind. Hallelujah!

Chemistry

→ Alpha Acid – 9% - 12%

→ Beta Acid – 4% - 5%

→ Total Oil – 1.8 - 2.2ml / 100g

**Available through Loughran
Brewer's Select in the UK.**
