BEST Melanoidin Light

BEST Melanoidin Light is a malt characterized by a high content of dextrans and aroma- and color-intensive Maillard compounds, the so-called melanoidins. In addition to a russet color, these impart a special flavor and a dry, full-bodied character to the beer. Melanoidins can have a positive effect on the shelf life of the beer. Since the malt contains a high proportion of enzymes, high grain bill proportions can also be used without any problems.

Flavor: Blackberry, malt, Plum
